

ATOC 1060: Review guideline for the final exam

Section 001; Fall 2010

NOTE: Three copies of the textbook are available as reserve material in the Math-Physics Library (in Duane, one floor up from the classroom)

[1] We will provide a review session for the final exam on December 7, Tuesday.

[2] The final exam will cover chapters 6, 12, 15, and 16 of the textbook and lectures 19-27 (lecture 26 is the review session). These are the materials that we cover after exam 2. You should review all materials in the lecture notes and corresponding chapters of the textbook.

[3] Lecture notes with clickers' questions in them have been posted online from lecture 19 onward. These questions serve as "example questions" for the final.
